

# Qualitative Research Primer

an overview of the basics

presented by Josué Meléndez Rodríguez, MA, MSW

# Introductions

Josué Meléndez Rodríguez

---

University of California, Berkeley

Qualitative Research Lead  
Senior Data Science Fellow

---

VERBI Software GmbH

Professional MAXQDA Trainer

---

Michigan State University

MA in Higher, Adult, & Lifelong Education  
MSW in Organizational & Community Practice

Loyola University Chicago

BSW in Generalist Practice

# Agenda

General Considerations

Philosophical Considerations

Methodologies & Methods

Theories & Frameworks

UC Berkeley Resources

Reading Recommendations

Coding & Analysis

## General Considerations

- Qualitative, Quantitative, & Mixed-Methods
- Differences of Opinion
- Requirements of Field, Journal, Etc.
- Systematic Flexibility

### Steps in Research Project

1. Determine Question(s)
2. Conduct Literature Review
3. Determine Methodology & Methods
  1. Collect Data
  2. Code & Analyze Data
  3. Determine & Write Findings
  4. Frame & Write Discussion

# Philosophical Considerations

## Ontology

subjectivist ----- constructivist ----- objectivist

## Epistemology

## Axiology

# Methodologies & Methods

## Methodologies

- Case Studies
- Ethnographies
- Phenomenologies
- Grounded Theory
- Narratives

## Methods

- Case Studies
- Ethnographic Methods
  - Observations
  - Interviews
- Text/Video/Picture Analysis

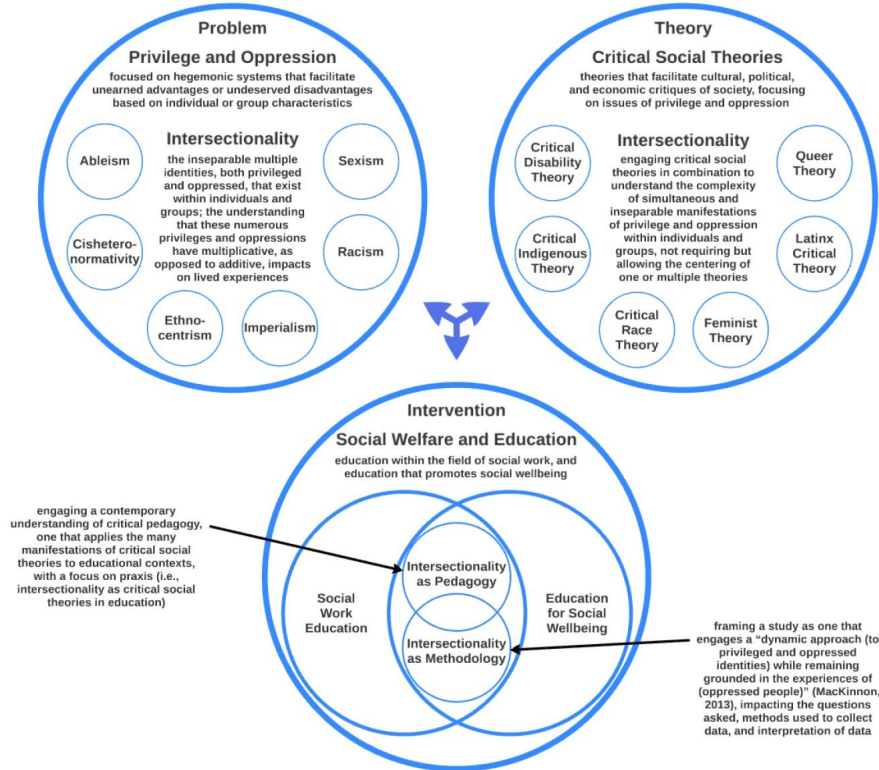

# Theories and Frameworks

- Theories
  - Formal Theories (e.g., Intersectionality Theory)
  - Tacit Theories
- Frameworks
  - Structural Framework (e.g., Transformative Framework)
  - Conceptual Framework

## Intersectionality as a Guiding Concept for Identifying, Understanding, and Impacting Social Problems

# Sample Conceptual Maps 1 of 3

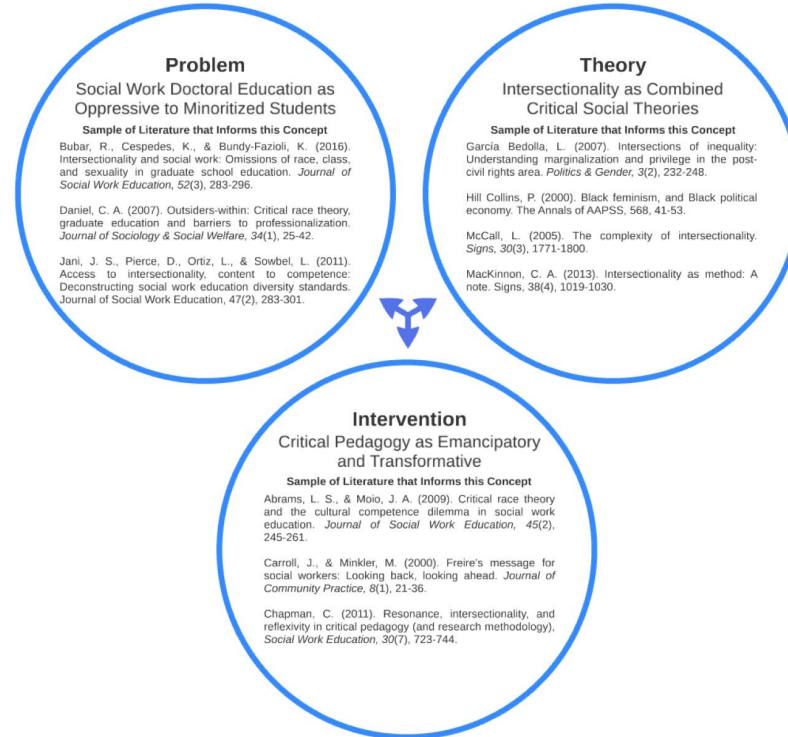

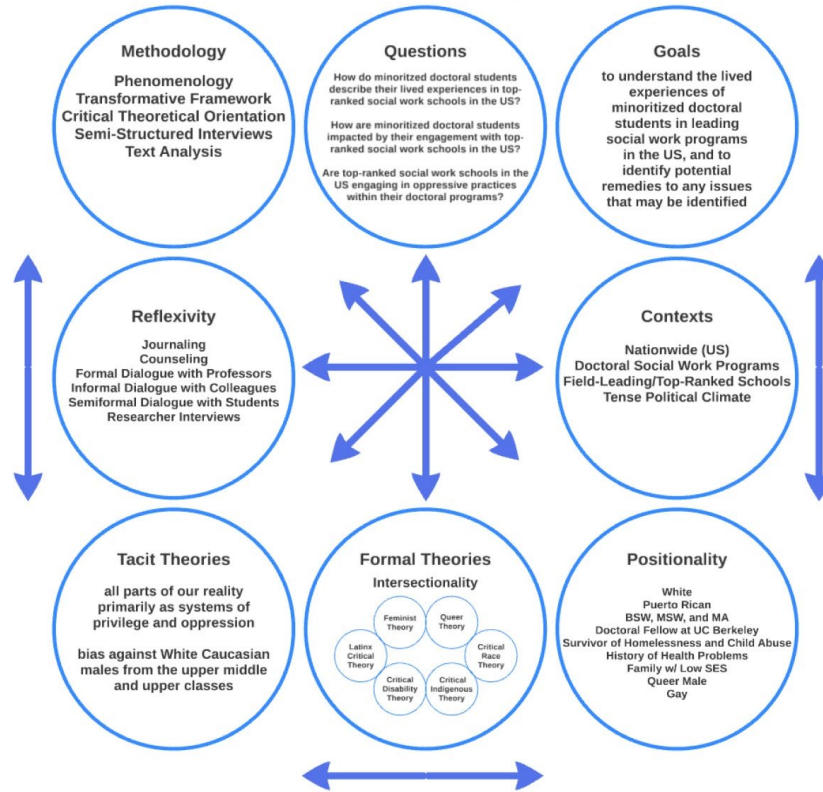

# Sample Conceptual Maps 2 of 3

## Literature Samples for Ethnoracial Minorities in Higher Education: Case Study from a Doctoral Program

Sample  
Conceptual  
Maps  
3 of 3

**Conceptual Framework for  
Ethnoracial Minorities in Higher Education:  
Case Study from a Doctoral Program**

# UC Berkeley Resources

## D-Lab

- Workshops & Presentations
- Working Groups & Consultants
- Workspace

## Institute for the Study of Societal Issues (ISSI)

- Presentations
- Trainings
- Fellowships

## Graduate School of Education (GSE)

- Introduction to Qualitative Research
- Advanced Qualitative Research
- Year-Long Qualitative Research Seminar

## School of Public Health

- Introduction to Qualitative Research
- Participatory Action Research (PAR)
- Critical Theories in Social Science Research

## African American Studies

- Interdisciplinary Research Methods

# Coding & Analysis

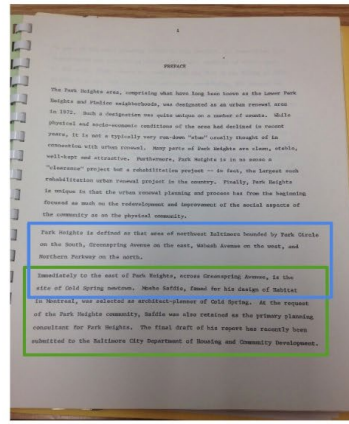

## What are Codes? What is Coding?

Coding is a way to organize data around common ideas, concepts, or categories ACROSS sources.

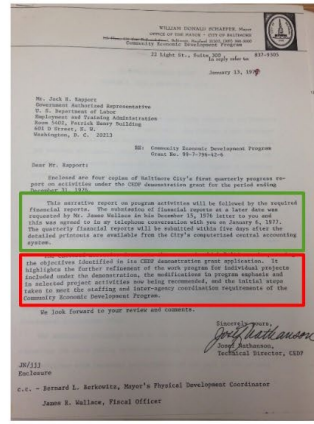

A

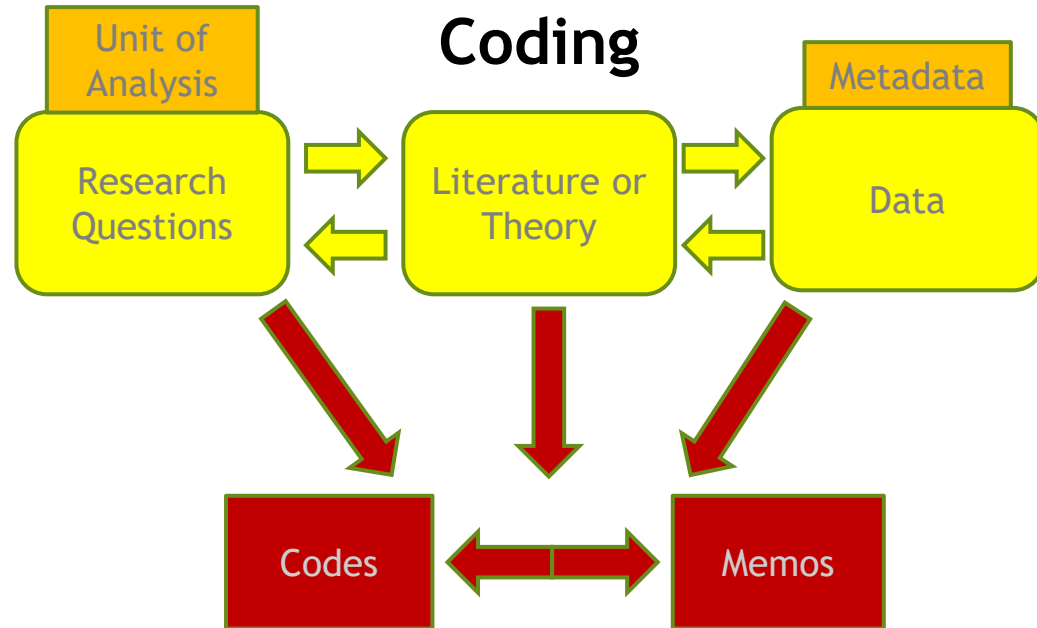

B

C

# Coding & Analysis

## Sample Code Creation Process - 4+ steps in 3 timeframes

1. Prior to Data Collection
  1. Generation of Deductive Codes
2. During Data Collection
  1. Generation of Deductive Codes, cont.
  2. Generation of Inductive Codes
3. After Data Collection
  1. Generation of Inductive Codes, cont.
  2. Organization of Codes into Preliminary Coding Scheme
  3. Test Application of Preliminary Coding Scheme & Editing into “Final” Coding Scheme

# Coding & Analysis

## What is Analysis?

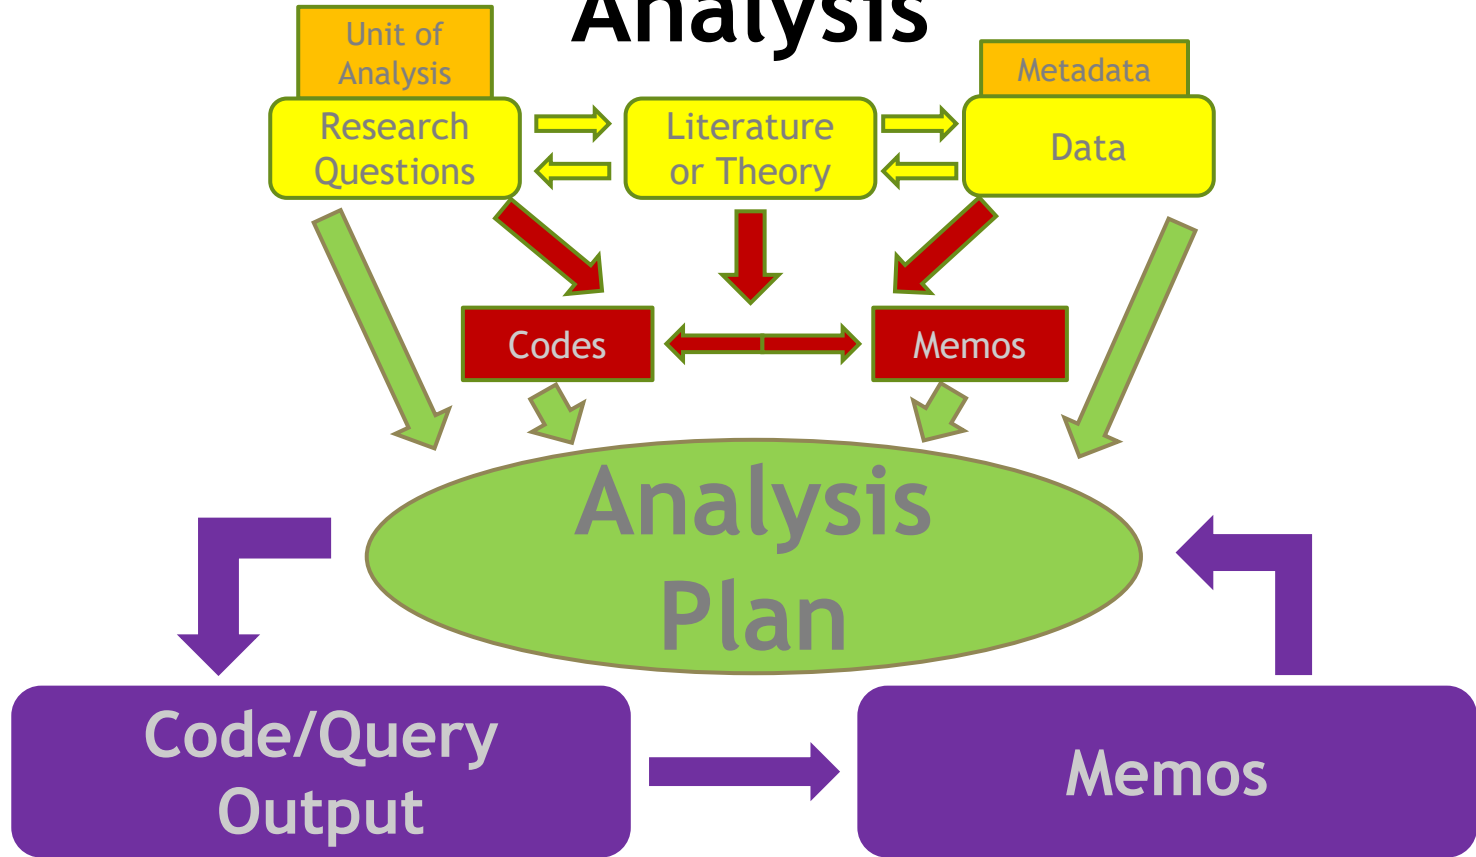

The process of identifying themes related to your research findings. This is different than identifying ideas/concepts/topics that come up throughout your data set. It's “bigger picture” stuff...

- Overarching Themes
- Subgroup Themes
- Typology Themes

# Analysis

Coding  
&  
Analysis

# QDA Software as a Tool for Organization & Engagement

## What It Does

- Structure Data & Codes
- Code Manually & Automatically
- Explore Data & Coded Segments
- Memo Generally & Specifically
- Create Visualizations & Summaries
- Quantify Qualitative Data
- Export Almost Everything

## What It Does Not

- Eliminate Bias
- Error-Free Autocoding
- Analytic Thinking
- Advanced Quantitative Analysis  
(MAXQDA can do some quant analysis)

## Potential Benefits

- Frees Time to Focus on Analysis
- Can Deal with Large Data Sets
- Improves Auditability
- Improves Credibility  
(among some audiences)
- Allows for Easy Transition to New Projects

## Potential Drawbacks

- Can Produce Erroneous Findings
- May Create Pressure to Engage Excessive Features &/or Use Large Data Sets
- Requires Learning the Software
