

## Visual Display of Public Health Data

Michael C. Samuel, Dr. P.H.  
CA DHS STD Control Branch

Cancer Rates by Site, Females, United States 1975-2011

\* Cancer sites include invasive cases only unless otherwise noted.  
† Rates are per 100,000 and are age-adjusted to the 2000 US Std Population (10 age groups - Census P25-110). The modeled rates are the point estimates for the regression line calculated for the Joinpoint Regression Program, Version 4.1.0, April 2014, National Cancer Institute.  
‡ Reference source: SEER 9 Annual Data Reports, Conneticut, Detroit, Hawaii, Iowa, New Mexico, Seattle, Utah, and Hawaii.

## Outline

- Key Issues
    - The Big picture
    - Tufte
    - Sponge Bob
  - History (les...)
  - Software
    - R, PowerPoint, Excel, et. al. (more R...)
    - Big data
  - Type of Displays
  - Technical Issues
    - Scale
    - "Nut and Bolts"
      - color, fonts, lines/grids, labels/legends, 3D
    - Production and reproduction (less...)
    - Chart junk, Human touch
  - Infographics, query systems
  - Interactive Displays and R-Shiny
  - "Great Graphs"
  - Conclusion
- Note: The example figures in this talk are to discuss form, not the actual substance of these data.

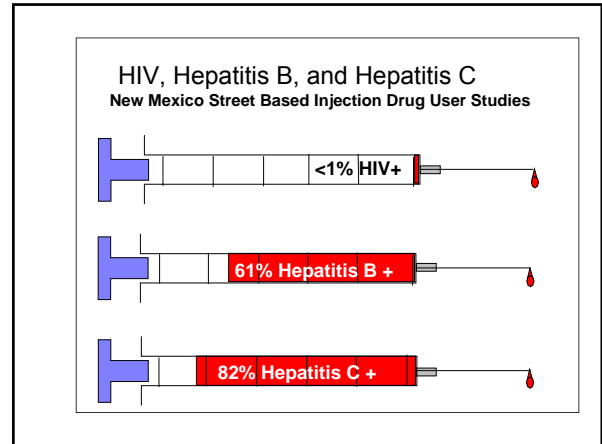

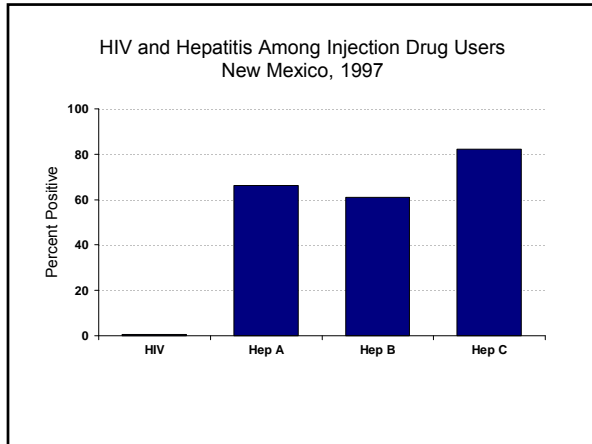

**Data**

**Action**

- Program
  - New program
  - Revised program priorities
- New guidelines
- New policy
- New hypothesis (may lead to new action)
- More (or less) money!

## HIV and Hepatitis among Injection Drug Users New Mexico, 1997

	N <u>tested</u>	% <u>Positive</u>	<u>95% C.I.</u>
HIV	1002	0.5	.16-1.6
Hep A	696	66.1	62.4-69.6
Hep B	950	61.1	57.9-64.2
Hep C	945	82.2	79.6-84.6

**Data**

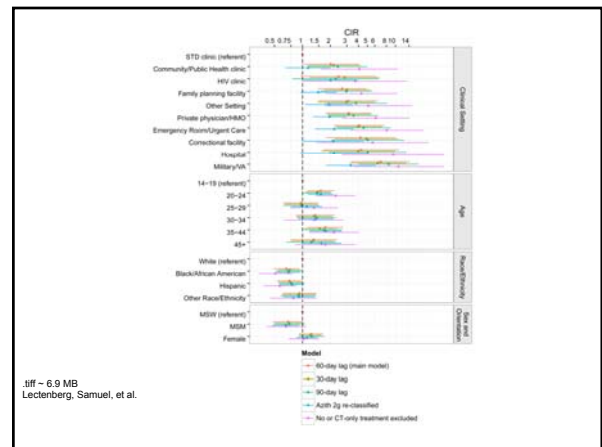

**Action**

**KEEPING IT CLEAN**

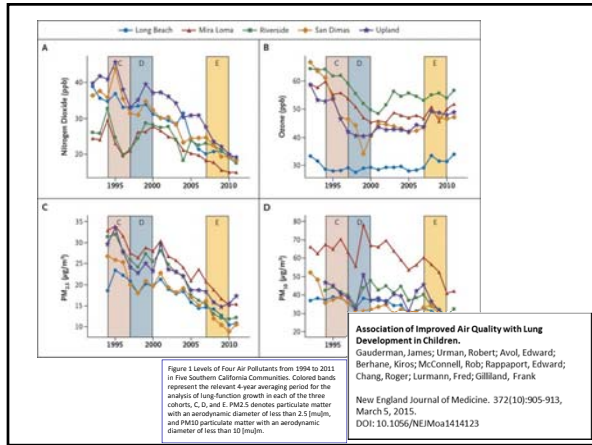

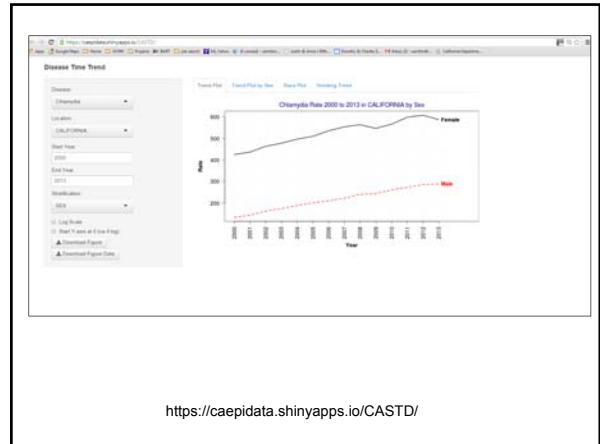

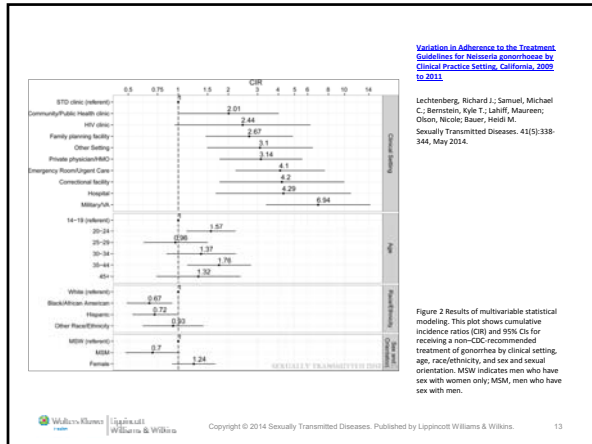

New Mexico is leading the way when it comes to its drug addicts.

- ### Guidelines for Effective Visual Display
- Communicate important information
  - Complexity is good, and...
  - Keep it simple, stupid
  - Know your audience
  - Oral presentation vs. written material
  - Data integrity
  - Clear labels and annotations
  - Use appropriate scale(s)
  - Use appropriate type of chart
  - Pay attention to details
  - Avoid extraneous "Chart Junk"

	Sensitivity Analysis			
	60-day lag (final model)	30-day lag	90-day lag	Adult Ig reclassified
<b>Site of Acquisition</b>				
STD clinic (reference)	1	1	1	1
Community/Public Health clinic	2.02 (1.32, 3.03)	2.17 (1.22, 3.23)	2.4 (1.16, 4.88)	1.5 (0.62, 3.1)
HIV clinic	2.43 (0.95, 6.31)	2.83 (1.06, 7.92)	2.27 (0.78, 6.81)	2 (0.62, 6.21)
Family planning facility	2.68 (1.46, 4.9)	3.02 (1.71, 5.34)	2.96 (1.55, 5.66)	1.48 (0.94, 2.13)
Other Setting	1.24 (0.55, 2.8)	2.54 (1.47, 4.39)	3.04 (1.78, 5.17)	1.95 (1.08, 3.51)
Private physician/IMMO	1.24 (0.55, 2.8)	2.54 (1.47, 4.39)	3.04 (1.78, 5.17)	1.95 (1.08, 3.51)
Emergency Room/Urgent Care	4.25 (2.23, 7.83)	3.89 (2.12, 7.21)	4.05 (2.34, 6.84)	2.2 (1.29, 2.96)
Correctional facility	4.2 (1.77, 9.98)	4.65 (2.1, 10.0)	5.05 (2.25, 12.45)	2.4 (1.45, 3.9)
Hospital	4.2 (1.77, 9.98)	4.65 (2.1, 10.0)	5.05 (2.25, 12.45)	2.4 (1.45, 3.9)
Military/VA	0.62 (0.19, 1.86)	0.59 (0.18, 1.8)	0.61 (0.19, 1.8)	0.62 (0.19, 1.8)
<b>Age</b>				
14-19 (reference)	1	1	1	1
20-24	1.58 (1.12, 2.22)	1.47 (1.07, 2.01)	1.48 (1.03, 2.04)	1.37 (0.93, 2.02)
25-29	0.95 (0.61, 1.46)	0.96 (0.63, 1.46)	0.96 (0.63, 1.46)	1.1 (0.75, 1.61)

Lectenberg, Samuel, et al.

## Edward Tufte

- Look at his books!
- Graphical Excellence
- The Lie Factor
- Data Density
- Less is more
- Small Multiples / Parallelism

Software

- Software**
- **Stand alone graphics packages**
    - PowerPoint, Open Office Impress
    - Great for presentations; easy to use
  - **Spreadsheets**
    - Excel
    - Easy to use
    - Can be difficult to modify or share
    - Direct integration of data and figures
  - **Stat packages with graphics**
    - SAS, SPSS, Stata, Epi Info
    - Integrate data and graphics
    - Some "point and click" some programming
    - Not as ideal for presentations
  - **R (S-plus)**
    - Free
    - Complete integration of data and graphics
    - Completely flexible graphics
    - Harder to learn/use
  - **Specialized Software**
    - Eg. NodeEX, "NetDraw" Network analysis

- Display Types**
- Tables
  - Line Charts
  - Bar Charts
  - Pie Charts
  - Scattergrams
  - Statistical Charts
    - Box Plots
  - Maps
  - Others
  - Hybrid

## Tables

### Been in a jail or prison in the past 12 months CA Gonorrhea Cases - 2004

Jurisdiction	Yes
	%
Alameda	18.8%
Fresno	20.9%
Kern	20.5%
Long Beach	8.5%
Orange	22.2%
San Bernardino	9.0%
Total	100.0%

STD Control Branch

### Been in a jail or prison in the past 12 months CA Gonorrhea Cases - 2004

Jurisdiction	N	%
Alameda	207	21.3%
Fresno	203	24.1%
Kern	199	24.1%
Long Beach	201	10.0%
Orange	432	12.0%
San Bernardino	84	25.0%
Total	1326	17.6%

STD Control Branch

## Line Graph

- X-axis truly or close to continuous
- Simple
- Complex: multi-line, 2-axis, logarithmic

### Primary & Secondary Syphilis Cases California, 1996–2002

### Primary & Secondary Syphilis, Cases by Gender California, 1996–2012

Rev. 8/2013  
STD Control Branch

FIGURE 1. Crude death rate\* for infectious diseases — United States, 1900–1996†

## Bar Chart

- Very common chart type
- Y-axis: count, rate or percent of something
- X-axis: qualitative variable, or ordered categorical variable
- Vertical bars or horizontal bars
- Simple
- Clustered/Grouped
- Stacked
- 100%
- Histogram=special case

<http://www.bbc.com/news/health-30932578>

Chlamydia Rates by Age Group  
California, 2002

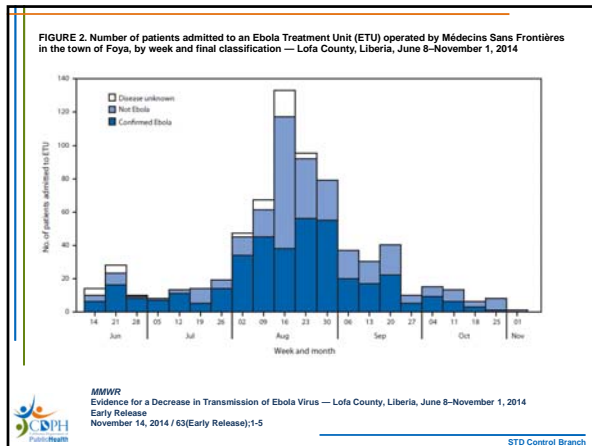

Chlamydia Rates by Age Group  
California, 2002

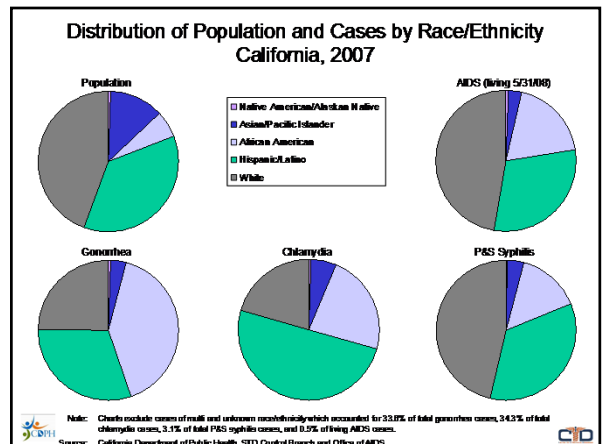

Incidence Rates of Chlamydia, Gonorrhea, P&S Syphilis, and AIDS by  
Age Group (in years) and Gender — California, 2012

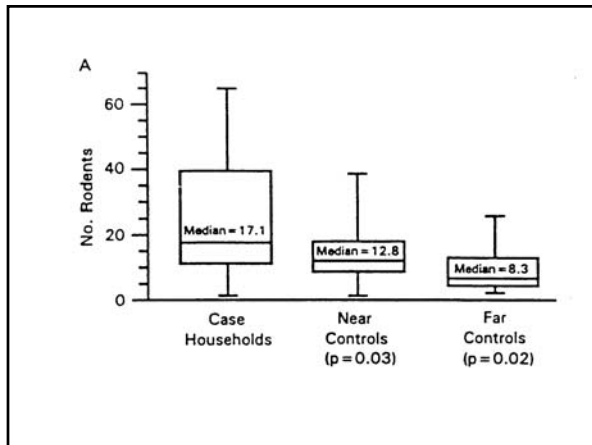

**Pie Chart**

- Tufte says they should never be used
- But
  - Very familiar to most people
  - Easy to understand
  - Effective if used carefully and sparingly

## Box Plots

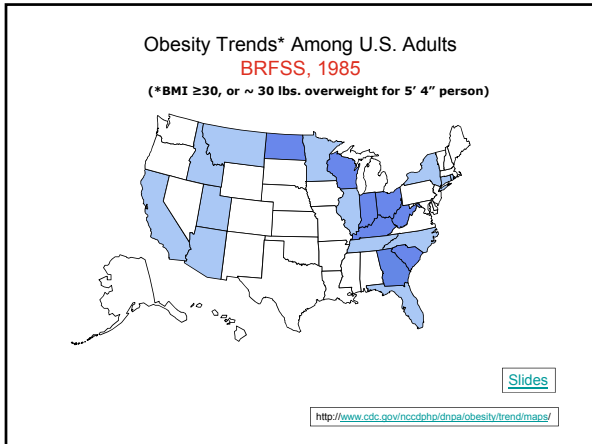

## Other Statistical Graphics

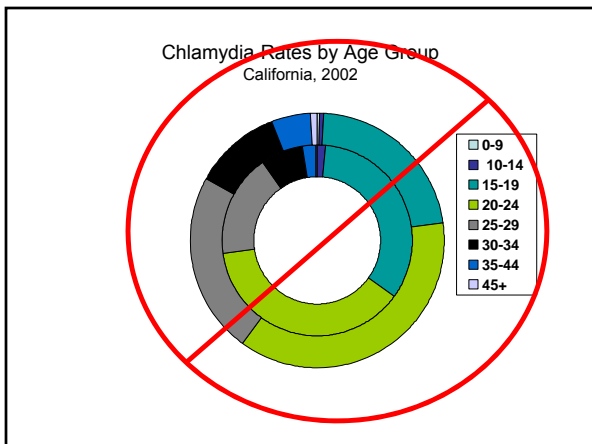

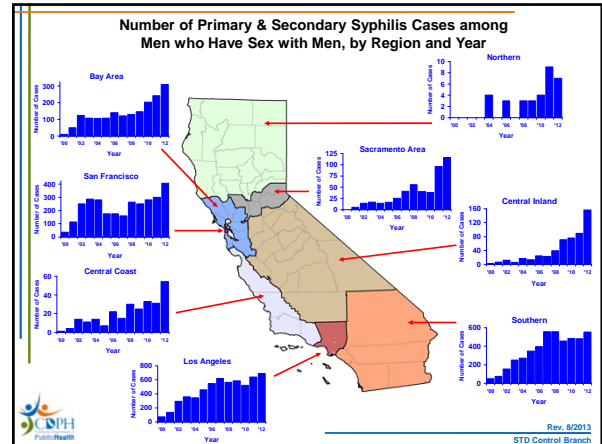

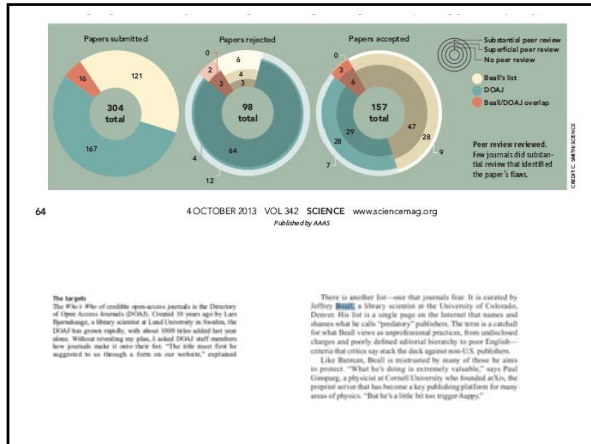

## Maps

Many Other Types  
and  
Hybrids

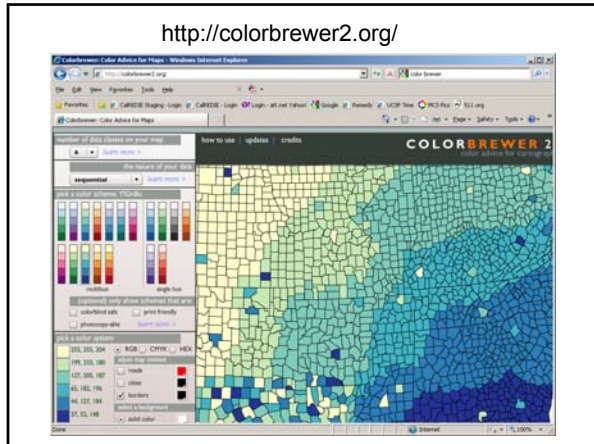

- ## “Nut and Bolts”
- Scale and Proportion
  - Labels and Legends
  - Grid Lines
  - Color
  - Animation/“PowerPoint”
  - Font
  - 3D
  - Production/Reproduction
  - Chart Junk
  - Software

- ## Color
- Use for a reason
  - Use nice colors
    - Shades of Blue
    - Shade of Yellow
    - Colors of Nature
  - Use color sparingly
  - RED can be good for Main Point, if used sparingly
  - Red often does not project well with slides and LCDs
  - Use consistent colors (and fonts, etc.)

**Leading causes of death in Los Angeles County, 2005.<sup>1</sup>**

Rank	Cause of death	No. of deaths	Premature death rank	Rank	Cause of death	Years of life lost	Death rank
1.	Coronary heart disease	15,154	1.	1.	Coronary heart disease	64,231	1.
2.	Stroke	3,775	8.	2.	Homicide	48,067	10.
3.	Lung cancer	3,036	5.	3.	Motor vehicle crash	32,394	12.
4.	Emphysema/COPD	2,770	13.	4.	Suicide	19,375	17.
5.	Pneumonia/Influenza	2,333	19.	5.	Lung cancer	18,490	3.
6.	Diabetes	2,305	7.	6.	Liver disease	17,897	11.
7.	Alzheimer's disease	1,546	50.	7.	Diabetes	16,971	6.
8.	Colorectal cancer	1,409	12.	8.	Stroke	16,442	2.
9.	Breast cancer	1,174	10.	9.	Drug overdose	16,138	21.
10.	Homicide	1,066	2.	10.	Breast cancer	13,610	9.

**Background Colors**  
and oral presentations

## Fonts / Fonts

- Use San Serif Fonts, Like Arial
- Not Serif Fonts, Like Times Roman
  - They Are Harder to Read
    - Particularly in Oral Presentations
      - When the Font Is Small
      - See, Isn't This Better
- ALSO, ALMOST NEVER USE ALL CAPS
  - IT'S HARD TO READ TOO
- Big Enough to read

## Production / Reproduction

- Test printers, laptops, LCDs before full production is necessary
- Often different colors and styles for:
  - PowerPoint oral presentation
  - Written report or manuscript
- Color
  - May not photocopy (or print) well
  - Can be expensive to reproduce
- Posters made on plotters require special consideration

## Line Type

FIGURE 1. Number of cases of severe influenza,\* by week of symptom onset – California, April 26, 2009–January 11, 2014†

\* Severe cases of influenza are defined as influenza infections resulting in intensive care unit (ICU) admission or death.

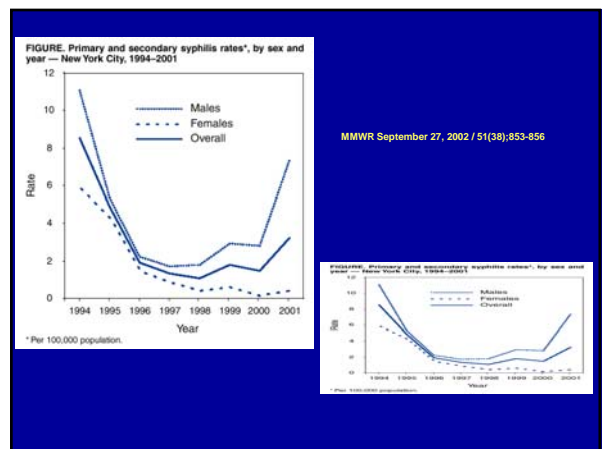

† ICU cases from three large local health jurisdictions have not been fully reported yet for the 2013–14 influenza season; for comparability, their ICU data are excluded from all years in this figure. Only cases occurring through January 11, 2014, are included because reporting for the cases with onset in the week ending January 18, 2014, was incomplete at the time of this report.

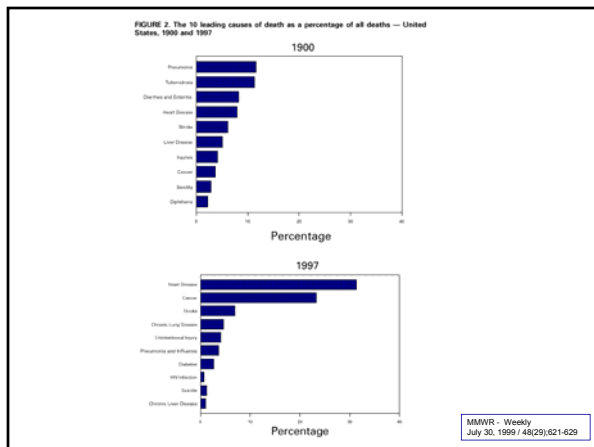

**Alternate Text:** The figure shows the number of cases of severe influenza, by week of symptom onset in California during April 26, 2009–January 11, 2014. The 405 severe influenza cases were reported from 41 of 61 local health jurisdictions (67%) in California and had onset dates of October 20, 2009–January 15, 2014. The largest number of severe cases (103) by week of symptom onset occurred during the week ending January 11, 2014. These represent both the highest cumulative number of severe cases at this point in the influenza season and the highest number of new cases in a single week since the 2009 (H1N1) pandemic.

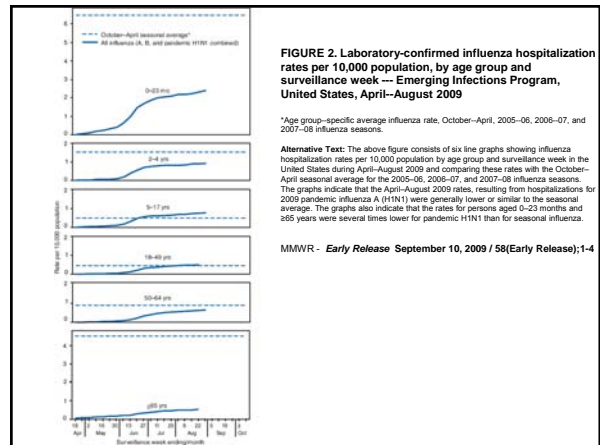

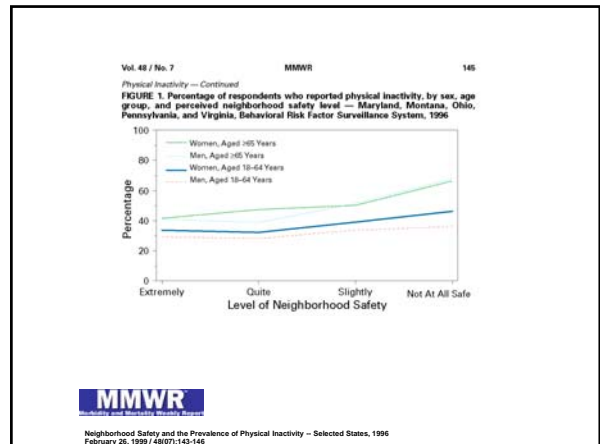

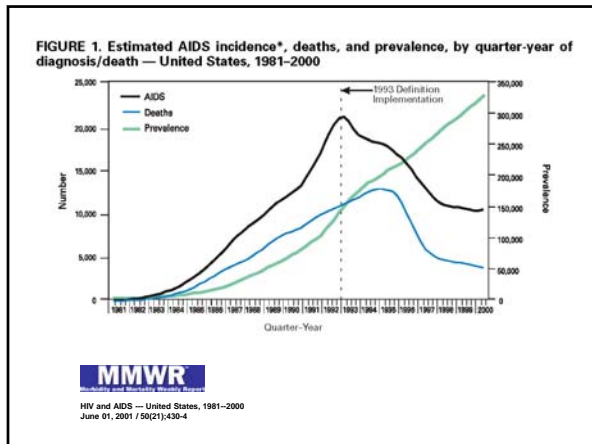

## Grid Lines

Scale

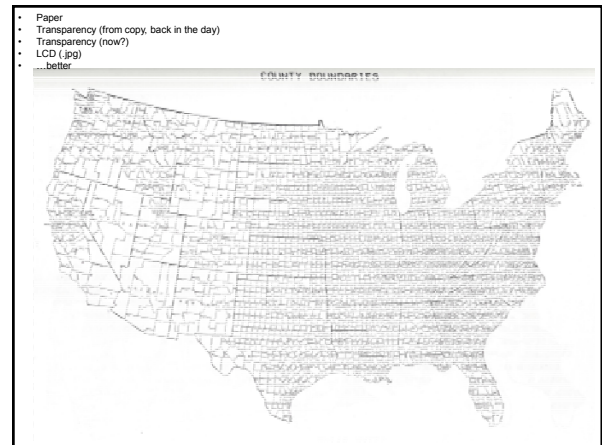

**Labels and Legends**

Production and Reproduction

**3D Charts**

- Unless there are 3 dimensions and the audience can handle it!

## Chart Junk

Percent of Kindergarteners with Up-to-Date Immunizations at Age 2, by Race/Ethnicity Alameda County, 2002

Percent of Kindergarteners with Up-to-Date Immunizations at Age 2, by Race/Ethnicity Alameda County, 2002

“Soften the Edges”  
“The Human Touch”

Maternal Mortality Rates, by Age of Mother California, 1999 to 2010, Selected Years

### Quality of Care

Maternal Health and Children

Mothers age 40 and older have had a significantly higher mortality rate than other age groups in California. The rate for this age group increased substantially from 1999–2001 to 2005–2007, before declining nearly as dramatically. In contrast, the mortality rate for mothers between 25 and 34 had the largest increase over the decade, while the rates for those age 35 to 39 and 20 to 24 have declined slightly.

## CALIFORNIA'S INFANT DEATH RATE 2005\*

\*California Department of Health Services 2006

## “Infographics”

FIG. 18. "HUMAN LIFE IN THE UNITED STATES IS BEING WASTED AS RECKLESSLY, AS SURELY, IN TIMES OF PEACE AS IN TIMES OF WAR"

### Public health takes on obesity: A route to better health

#### We have a growing problem

#### The burdens of obesity

## Stories...
